

# Transboundary Water Governance

SPRING 2025 • C/AM 305 • Dr. Tuti Baker

TR 3:00 p.m. - 5:20 p.m.  
CRN 23456 • 5 credits

“What makes a good upstream neighbor,” Emma Norman asks in *Governing Transboundary Waters: Canada, the United States, and Indigenous communities*.

In this course, students study the shared waters of Canada, the United States and Indigenous nations on the Salish Sea, and the Yukon and Columbia Rivers. How are Canada and the United States managing transboundary waters? How do these governing structures differ from management practices of Indigenous nations of waters in their traditional homelands?

**Also offered as FAIR 336B - CRN 23843**
